Tilton & Northfield Aqueduct Co., Inc. has a **Backflow Prevention Program**. It is required for all accounts with testable dual check or RPZ backflow preventers to be tested bi-annually only by the authorized agent of the Company. The rate for this test will be based on a per unit charge billed directly to the customer. Nonpayment of such invoice, testing failure or failure to make required repairs may result in termination of water service. These backflow preventers are provided and installed at the cost of the customer. **This applies only to the non-residential customers.**

Residential customers are required to have a non-testable dual check backflow device supplied by the Company.
